

eMoneyFlow Physical Prepaid Cards

eMoneyFlow offers a secure, simple, and affordable prepaid Mastercard payout tool which assists businesses in rendering real-time payouts in the European Economic Area. Paying staff, content providers, vendors and affiliates with cash, bank wires, or paper cheques can be rather expensive and impractical.

Therefore, eMoneyFlow physical prepaid cards offer a cost-effective payout alternative. Take advantage of our easy-to-use interface or a direct API integration. Cards are available for both B2C and B2B usage. Cardholders are able to use the eMoneyFlow prepaid card at any ATM and POS system within the Mastercard network.
